

GLAZED VITRIFIED TILES

DOUBLE CHARGED VITRIFIED TILES

Double charged vitrified tiles are further processed to apply two layers of a powdery substance on the surface of the tile. This substance is made of carefully selected natural minerals, clay and other materials, which gives the tile its unique look and feel. The result is a tile with a smooth, glossy finish that is highly resistant to scratches and water damage. When compared to glazed vitrified tiles, double charged tiles are far more resistant to surface damage and wear and tear. The double layer of powdery substance on the tile's surface makes it more resistant to oils, stains and other liquids. The double charged tiles also have a higher degree of hardness than their glazed counterparts, making them more resistant to scratches and chipping.

Double charge top layer body is 3 to 4 mm thick. A double charged tile is a type of vitrified tile that is available in a variety of colors and sizes, making it widely used in homes, offices, and public spaces.

TECHNICAL FEATURES

SUITABLE FOR SUITABLE FOR LIGHTTRAFFIC TECHNOLOGY AREAS

RESISTANT TO LIQUID

RESISTANTTO SCRATCHES

EASYTO CLEAN

RESISTANT TO HIGH TEMPERATURE

CHEMICAL AND STAIN RESISTANT

FROST RESISTANCE

HYGIENIC SURFACE

IMPACT RESISTANT

UV RAYS

APPLICATION AREA

COMMERCIAL SPACES

MALLS & RESTAURANTS

PUBLIC

Providing stylish and comfortable tile solutions for indoor spaces is Nice Granito's mission. Our company manufactures and exports double charge vitrified tiles and glazed vitrified tiles all over the world.
